

Finally, The Verifiable False Alarm System is Here.

It's a New Era of Security System with Pre- and Post-Alarm Monitoring Stations. The CA-8000 Bridges-the-Gap between CCTV and burglar alarm specialists at the central station. Use CCTV and this system together to verify an event before calling the police!

Learn what the CA-8000, a Verifiable Video Image Transferring System using exclusive VIT System Technology (Pat. Pending), can do for you! It's actually a 3-in-1 machine that's a Multiplexer (any time lapse VCR and DVR can be connected to the unit to record views from cameras) a Remote Viewing (TCP/IP) unit and VIT System.

The Eight Channel multiplexer CA-8000 Stand Alone VIT System unit detects disturbances with up to 8 variable region Motion Detection on cameras and with its sensors (PIR, Fire, among others), and a siren. When Armed and an alarm and signal is detected, the Pre-Alarm clip of 10 frames/sec, and post alarm clip of 50 frames/sec. are sent to the Monitoring Station via the Internet within just a few seconds.

Using designs and technology unavailable anywhere until now, the CA-8000 pre-and-post alarm can be sent anywhere for visual verification of an intruder

by the new Verifiable Video Image Transferring System. This virtually eliminates any hassles between the customer and the Monitoring Station. Simply, when the monitoring station calls the home or business owner, they will also request them to view the scene on the internet. This allows the monitoring station to notify authorities only of a verified disturbance—within a second.

The Monitoring Station can also monitor the event through cameras with mic and warn intruders with speakers, then siren, to evacuate the premises.

Ideal Proprietary System for Monitoring Stations

- ▶▶ Monitor audio with cameras with microphones. Audio inputs (4 for CA-8000 and 8 for ACA-8) and two audio outputs for Monitoring Station to warn intruders.
- ▶▶ CA-8000 Stand Alone VIT System may be connected to any DVR systems, such as our Duplex X-4080, or any PC-based DVR, as back up.
- ▶▶ Choice of ACA-8 VIT System, a smaller wall-mountable panel box with rechargeable battery or
- ▶▶ the Professional Stand Alone Rack-mountable CA-8000 in a black, 19-inch width cabinet.
- ▶▶ 8 Sensor inputs for Motion detection, Fire or Gas, along with Multi-level Motion detection on cameras.
- ▶▶ Live Real Time Display on Monitor Quad/Full/ Auto Sequence/PIP.
- ▶▶ Remote viewing with TCP/IP Internet, even faster now with multi-processors
- ▶▶ Rechargeable battery backup systems on ACA-8.
